

AMENDMENTS TO THE SPECIFICATION

Please renumber the paragraph beginning on page 6, after paragraph [00041], as follows:

[00041A] The details of opening 18 are depicted in Figures 7–9. Opening 18 includes a pair of L-shaped members generally indicated as 42, each of said L-shaped members having a horizontal leg 44 and a vertical leg 46. Said L-shaped members are located in a back-to-back manner such that vertical members 46 are adjacent or juxtaposed one another and horizontal legs 44 are attached to top wall 16. Vertical legs 46 have extended ends 48, where said vertical legs are attached or fixed together. Strips of hook and loop material 50 and 51 are attached at the upper ends of vertical legs 46 such that a strip is mounted on both sides of each vertical leg 46. It should be noted that the strips 50 are mounted on the sides of vertical legs 46 adjacent one another, and therefore would be mating strips such that one strip 50 would consist of loops and the other strip 50 of hooks, thereby enabling opening 18 to be closed and opened. Both of strips 51 consist of loop material. Opening 18 also includes a slit 52 in the overlapped region 38 of top 16 and a pathway 54 defined by the area between adjacent vertical legs 46. Slit 52 and pathway 54 span between sealed extended ends 48.
